## FLSA Injunction Responses – December 2016

### Makeup of Responding Institutions

N = 495, response rate = .28 (outstanding)

	Frequency	Percent
<b>Size</b> Fewer than 1,710	140	28.3
1,710-3,580	145	29.3
3,581-9,858	118	23.8
More than 9,858	92	18.6
Total	495	100.0

	Frequency	Percent
<b>Affiliation</b> Public	203	41.0
Private non-religious	152	30.7
Private religious	140	28.3
Total	495	100.0

	Frequency	Percent
<b>Classification</b> System office	9	1.8
Doctoral	121	24.4
Master's	147	29.7
Baccalaureate	135	27.3
Associate's	74	14.9
Special focus	9	1.8
Total	495	100.0

## Overall Responses to Injunction

		Frequency	Percent
<b>Which of the following best characterizes your response to the delayed implementation of the DOL's new OT rule?</b>	Implemented all changes	139	28.1
	Implemented some changes/ delayed some	159	32.1
	Delayed all	157	31.7
	Rolling back/reversing at least some changes	40	8.1
	Total	495	100.0

- Approximately equal percentages of institutions (around 30%) have opted to:
  - Implement all planned changes anyway
  - Implement some changes and delay others
  - Delay all changes
- Only 8% are rolling back/reversing changes already implemented

		<b>Which of the following best characterizes your response to the delayed implementation of the DOL's new OT rule?</b>				Total
		Implemented all changes	Implemented some/ delayed some	Delayed all	Reversing at least some	
<b>Size</b>	Fewer than 1,710	39 27.9%	48 34.3%	46 32.9%	7 5.0%	140 100.0%
	1,710-3,580	45 31.0%	37 25.5%	48 33.1%	15 10.3%	145 100.0%
	3,581-9,858	28 23.7%	39 33.1%	39 33.1%	12 10.2%	118 100.0%
	More than 9,858	27 29.3%	35 38.0%	24 26.1%	6 6.5%	92 100.0%
<b>Total</b>		139 28.1%	159 32.1%	157 31.7%	40 8.1%	495 100.0%

- No significant differences by size

	Which of the following best characterizes your response to the delayed implementation of the DOL's new OT rule?				Total
	Implemented all changes	Implemented some/delayed some	Delayed all	Reversing at least some	
<b>Affiliation</b> Public	42 20.7%	72 35.5%	65 32.0%	24 11.8%	203 100.0%
Private non-religious	53 34.9%	52 34.2%	42 27.6%	5 3.3%	152 100.0%
Private religious	44 31.4%	35 25.0%	50 35.7%	11 7.9%	140 100.0%
<b>Total</b>	139 28.1%	159 32.1%	157 31.7%	40 8.1%	495 100.0%

- Publics least likely to have already implemented all changes
- Private religious least likely to take a mixed approach; more likely to either delay all or implement all
- Private non-religious least likely to delay all changes; private religious most likely to do so
- Publics most likely to reverse changes already implemented; private non-religious least likely to do so

		Which of the following best characterizes your response to the delayed implementation of the DOL's new OT rule?				Total
		Implemented all changes	Implemented some/ delayed some	Delayed all	Reversing at least some	
<b>Classification</b>	System office	3 33.3%	4 44.4%	2 22.2%	0 0.0%	9 100.0%
	Doctoral	36 29.8%	47 38.8%	29 24.0%	9 7.4%	121 100.0%
	Master's	36 24.5%	41 27.9%	58 39.5%	12 8.2%	147 100.0%
	Baccalaureate	41 30.4%	44 32.6%	38 28.1%	12 8.9%	135 100.0%
	Associate's	19 25.7%	21 28.4%	27 36.5%	7 9.5%	74 100.0%
	Special focus	4 44.4%	2 22.2%	3 33.3%	0 0.0%	9 100.0%
	<b>Total</b>	139 28.1%	159 32.1%	157 31.7%	40 8.1%	495 100.0%

- No significant differences by classification

## For Those Implementing Some Changes/Delaying Some Changes (N = 159)

**Which changes have been implemented or will proceed without delay? (Choose all that apply.)**

	Frequency	Percent
Raising postdoctoral fellow salaries above the \$47,478 threshold	21	41.2 (out of N = 51 doctoral)*
Reclassifying one or more positions from exempt to non-exempt	66	41.5
Raising salaries of one or more professional positions above the threshold	112	70.0
Changing working hours or other provisions for residential managers	24	15.1
Changing travel policies for one or more positions	18	11.3
Other	20	12.6

**Which changes will be delayed or placed on hold? (Choose all that apply.)**

	Frequency	Percent
Raising postdoctoral fellow salaries above the \$47,478 threshold	11	21.6 (out of N = 51 doctoral)*
Reclassifying one or more positions from exempt to non-exempt	123	77.4
Raising salaries of one or more professional positions above the threshold	55	34.6
Changing working hours or other provisions for residential managers	47	29.6
Changing travel policies for one or more positions	35	22.0
Other	13	8.2

- For those with a mixed response, the change most likely to have been implemented is raising professional salaries above the threshold
- The change most likely to be delayed is reclassifying from exempt to non-exempt

\*Only doctoral institutions that responded that they "implemented some/delayed some changes" were analyzed for this statistic.

## For Those Reversing Some Changes (N = 40)

Which changes will be reversed? (Choose all that apply.)

	Frequency	Percent
All positions changed to non-exempt will be changed back to exempt	20	50.0
Some positions changed to non-exempt will be changed back to exempt	18	45.0
All salary adjustments will be reversed	6	15.0
Some salary adjustments will be reversed	3	7.5
Changes to working hours/other provisions for residential managers will be reversed	2	5.0
Changes to travel policies will be reversed	0	0
Other	6	15.0

- Most likely to be reversed are changes to exempt status for some or all positions
